Evergreen announces yet another pair of new 2002 product accessories for the Lightnin' Strike™ Rod Holder with Auto Hook-Set. The innovative T-Bone™ and Half-Rack™ Trolling Bar Systems. These neat accessories allow the angler to quickly and easily set up a "spider-rig" when trolling or drift fishing for crappies, walleyes or stripers.

The T-Bone™ System mounts four Lightnin' Strike Rod Holders and comes complete with trolling bar, four rod holders, mounting base and a magnum storage bag. The Half-Rack™ System comes with two rod holders, trolling bar and base and a standard storage bag. We've seen great success using a combination of these two set-ups. Both the T-Bone and the Half-Rack trolling bars may be purchased separately.

Look for the Lightnin' Strike and accessories at all major sporting goods suppliers or log onto the website for a detailed list at [www.lightnin-strike.com](http://www.lightnin-strike.com).
